Note:

- Rated current values are determined according to the testing conditions. The above ratings were obtained by conducting tests under the following conditions.
 - Ambient temperature: 20°±2°C
 - Ambient humidity: 65±5%
 - Operating frequency: 20 operations/minute
- Minimum applicable load: 10 mA at 5 VDC

*1. Malfunition within 1 ms.

*2. With no icing or condensation.

*3. The degree of protection from the front of the panel.

Note: 1. Do not allow the load current to exceed the rated value.
2. The contact ON/OFF timing is not synchronized. Confirm performance before application.

3. Once the contacts have been used to switch a load, however, they cannot be used to switch smaller loads. The contact surfaces will become rough once they have been used and contact reliability for smaller loads may be reduced.
