VIA® – Variable Interface Adaptor

The Efficient Board-to-Board Connection Solution

Rosenberger series VIA® is designed for board-to-board and board-to-module RF interconnections. The enhancement of the mechanical design is outstanding: limited detent and smooth bore interfaces are integrated into the adaptor – one side of the bullet is responsible for limited detent, the other side for smooth bore.

Our Rosenberger Online Catalog contains the current VIA® product range with specific details, including data sheets, assembly instructions and panel piercings.

VIA® Advantages

- VIA® combines all advantages of board-to-board connections (SMP, Longwipe-SMP, P-SMP, MBX)
- Reliable, advanced & secure connection due to catch mechanism inside the board-to-board connection
- Blind mateable – assembling of modules is fast and save
- PCB-connector is available with pre-assembled enhanced funnel or the enhanced funnel can easily be field assembled by the customer
- Detent or smooth bore side is defined by the adaptor, due to identically constructed PCB-connectors
- Short board-to-board distance
- Compensating misalignment
- Available as SMD / THT
