

Series: Ceramic Chip Antenna

TECHNICAL DATA SHEET Description: Quad Band Monopole Ceramic Chip Antenna

PART NUMBER: W3073

Features:

• Frequency:

824-894/1710-2170MHz or 880-960/1710-2170MHz

- Size 10 x 3.2 x 4 mm
- PCB Keep out 40 x 10 mm
- Polarization Linear
- Radiation pattern Omni

Applications:

- 2G/3G
- Nb-loT
- GSM850 or EGSM900/, PCN1800, PCS1900 and WCDMA

All dimensions are in mm / inches

Issue: 2037

Series: Ceramic Chip Antenna

Description: Quad Band Monopole Ceramic Chip Antenna

PART NUMBER: W3073

ELECTRICAL SPECIFICATIONS

Antenna Type	Chip antenna	
Frequency	Version1: 868-870MHz	
	1710-2170MHz	
	Version2: 880-960MHz	
	1710-2170MHz	
Nominal Impedance	50 Ω	
Radiation Pattern	Omni	
Polarization	Vertical	
Power Withstanding	3W	
MECHANICAL SPECIFICATIONS		
Compact size	10 x 3.2 x 4mm	
Weight	0.6g	
Fixing system	SMT	
MSL(MOISTURE SENSITIVITY LEVEL)	1	
ENVIRONMENTAL SPECIFICATIONS		
Operating Temperature	-40 ~ +85° C	
Storage Temperature	-10 ~ +30° C	
RoHS Compliant	Yes

Recommendations for ceramic chip antenna storage

Storage time

Products should be used within 6 months from the day of manufacturers packaging even when they are stored under below mentioned conditions. Longer storage period may decrease the component solderability.

Storage environmental conditions

To maintain solderability of Pulse ceramic products care must be taken to control the storage and use conditions:

- Do not store or use products in a corrosive atmosphere, especially where chloride, sulphur or sulfide, alkali or acid salts exist in the air. Corrosive gases may cause oxidation of electrodes and reduce solderability
- Keep temperature and humidity stabile and do not exceed the below mentioned minimum and maximum conditions: Temperature: -10 to +30 Deg C Humidity: below 60% RH
- Do not store the products under direct sun light.

It is recommended to keep the products in manufacturers packing (tape&reel) until the time of assembly and soldering process. Air tight vacuum package is recommended in the conditions where it is know to be some corrosive gases.

Handling

Do not touch the components with bare hands. Protective gloves must be used to prevent contamination of terminals which may cause reduced solderability. Do not touch or damage the silver plated surface by any sharp objects. Soft materials (plastic, wood etc.) must be used if tweezers or other tools are used to pick the components. Avoid any excess mechanical shock or vibration during storage and handling.

PART NUMBER: W3073

Recommendation for reflow soldering process

Printing stencil thickness 0,15 - 0,25 mm is recommended for the solder paste. The maximum soldering temperature should not exceed 260°C. The temperature profile recommendations for reflow soldering process is presented in the Figures 1 and 2. The reflow profile presented in figure 1 describes minimum reflow temperatures. The reflow profile presented in figure 2 describes maximum reflow temperatures. located at the center of the coverage area.

	Method of heat transfer	Controlled hot air convection
1	Average temperature gradient in preheating	2.5 °C/s
2	Soak time	2-3 minutes
3	Max temperature gradient in reflow	3 °C/s
4	Time above 217 °C	Max 30 sec
5	Peak temperature in reflow	230 °C for 10 seconds
6	Temperature gradient in cooling	Max -5 °C/s

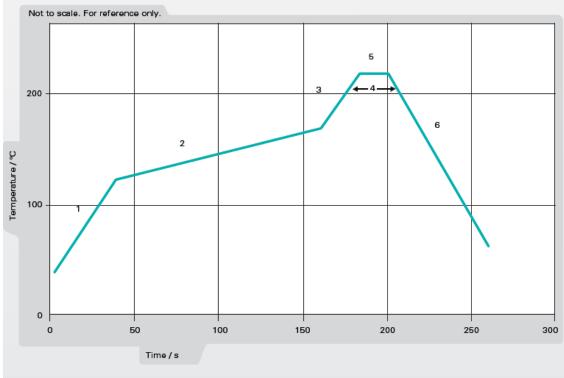

Figure 1. Minimum temperature profile recommendation for reflow soldering process
