

# Slotted Optical Switch

## OPB315 Series

### Features:

- Lateral package
- Opaque black plastic
- 850 nm wavelength
- Choice of leads or wires

### Description:

Each slotted optical switch in this series consists of an infrared emitting diode (LED) and a NPN silicon phototransistor mounted on opposite sides of a 0.90" (22.9 mm) wide slot in an opaque black plastic package.

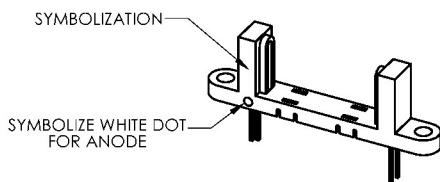

The **OPB315L** has 0.25" minimum leads, while the **OPB315WZ** has a minimum of 24" (610 mm) 26 AWG wires.

Phototransistor switching takes place whenever an opaque object passes through the slot.

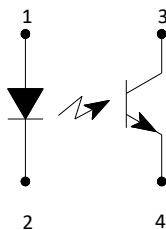

### Applications:

- Non-contact object sensing
- Assembly line automation
- Machine automation
- Equipment security
- Machine safety
