

### SuperCool Series Thermoelectric Cooler Assembly

The SDA-195-24-02 Direct-to-Air thermoelectric cooler assembly is a high performance thermoelectric based heat pump. It is designed to temperature control small chambers used in medical diagnostics or sample storage compartments in analytical instrumentation. This unique, **patented** design offers a high performance hot side heat dissipation mechanism that convects heat more efficiently than conventional heat exchanger technologies. The design utilizes custom thermoelectric modules to maximize cooling capacity and premium grade fans to reduce noise. Moisture resistant insulation is used to keep condensation from penetrating into the thermoelectric module cavity. This unit operates at 24 VDC and is designed for indoor lab use environment. It has a maximum  $Q_c$  of 193 Watts when  $\Delta T = 0$  and a maximum  $\Delta T$  of 39 °C at  $Q_c = 0$ .
