Description

The CSC32AC 32-Device AC Charging Station Cart provides AC charging, secure storage and cord management for up to 32 Chromebooks and laptops. It's recommended for education, office, commercial, retail, industrial and healthcare environments.

32 AC outlets provide convenient charging for Chromebooks and laptops with a screen size up to 15 inches. Their AC adapters plug into the cart's 32 NEMA 5-15R outlets as needed, up to 1,440 total watts. The CSC32AC also charges tablets and other USB devices through their power adapters. A built-in circuit breaker protects against overloads. The 10-ft. (3.05 m) AC input cord with NEMA 5-15P plug reaches distant outlets to help you place the cart in a convenient location.

The cart promotes comprehensive device protection with steel construction and a black powder-coated finish for long-term durability. It locks with the included keys to help prevent device theft, damage or tampering, and flow-through ventilation helps prevent overheating.

The cart also encourages clutter-reducing organization of devices and cabling. AC outlets, power adapters and cords store out of sight. Toolless trim panels permit quick service access.

When moving devices from room to room, the cart provides convenient mobility. Large swivel casters with non-marking wheels improve the ride over uneven surfaces and lock to help prevent unwanted movement at rest. The reversible wide-grip handle assists cart control.

The cart is easy to configure. It ships ready for quick, easy installation, and the handle and cord wrap attach on either side. The split front doors open 180 degrees for improved device and service access. Rear-panel slots support optional wall-mount installation, and removable shelf dividers accommodate thicker devices.
