#### **Management Interface**

The ENVIROSENSE management interface is exclusively used for SNMPWEBCARD based products. You will be able to distinguish its use, by the round port on the SNMPWEBCARD-enabled device. Models that support the newer EnviroSense2 sensor modules can be distinguished by a USB-A port in place of the round <a href="ENVIROSENSE">ENVIROSENSE</a> port. For managing the units containing the round port, Tripp Lite recommends using the <a href="PowerAlert Console Launcher">PowerAlert Console Launcher</a> rather than a web browser. This application enables local access of the PDU using a self-contained, compatible Java Runtime Environment version. The Console Launcher can be downloaded for free; click the above link or go to the Management Solutions / Utilities page. Units with the new interface work will with most current web browsers.
