

Suited for Intermediate Users

LulzBot Mini Glass/PEI Print Surface

The LulzBot Modular Print Bed System ensures your LulzBot Mini is going strong for years to come with improved ease-of-maintenance, increased versatility, and better heat uniformity across the bed surface. The system is an easy and smart upgrade to any existing LulzBot Mini 3D Printer.

The LulzBot Mini Glass/PEI Print Surface is the upper half of the Modular Print Bed System and features a PEI (Polyetherimide) sheet laminated to a borosilicate glass plate.

PRODUCT ALERT (1)

Upgrading your LulzBot Mini?

Get the other half of the LulzBot Mini Modular Print Bed System [here](#).

Works with: LulzBot Mini

- Features

The Glass/PEI Print Surface is effectively two surfaces in one. Depending on the filament in use, print on PEI or flip the surface over to print directly on plain glass or experiment with other print substrates.

Keep a spare Glass/PEI Print Surface on hand to increase up time when your PEI surface needs maintenance or replacement.

Compatible with all generations of LulzBot Mini.
