3W Mini Power LED Light Source

Description

The Broadcom[®] 3W Mini Power LED Light Source is a high-performance energy-efficient device that can handle high thermal and high driving current. An option with electrically isolated metal slug is also available.

The low-profile package design and ultra-small footprint are suitable for a wide variety of applications especially where space and height is a constraint.

The package is compatible with the reflow soldering process. To facilitate easy pick-and-place assembly, the LEDs are packed in EIA-compliant tape and reel.

CAUTION! Keep the LEDs in a moisture barrier bag when not in use because prolonged exposure to the environment might cause the silver-plated leads to tarnish, which might cause difficulties in soldering.
