AEA-series

Feature

High power & peak power
High efficiency
Low profile (41mm, 1.61 inch = meet to 1U height)
For medical electric equipment (ANSI/AAMI ES60601, EN60601-1 3rd, IEC60601-1-2 4th Ed.)
Suitable for BF application (Output-FG : 1MOPP, Input-Output : 2MOPP)
OVC III (according to EN62477-1)
Complies with SEMI F47 (Refer to Instruction Manual)
UL508 (Optional)

Safety agency approval

UL62368-1, ANSI/AAMI ES60601-1
C-UL (CAN/CSA62368-1, CAN/CSA60601-1)
EN62368-1, EN60601-1 3rd
Complies with IEC60601-1-2 4th Ed.
EN62477-1 (OVC III)
UL508 (Optional)

5-year warranty (Refer to Instruction Manual)

CE marking

Low Voltage Directive
RoHS Directive

EMI

Complies with FCC-B, CISPR11-B, CISPR32-B, EN55011-B, EN55032-B, VCCI-B

EMS Compliance : EN61204-3, EN61000-6-2 IEC60601-1-2(2014), EN60601-1-2(2015)

EN61000-4-2
EN61000-4-3
EN61000-4-4
EN61000-4-5
EN61000-4-6
EN61000-4-8
EN61000-4-11

Example recommended EMI/EMC filter
EAC-20-472

High voltage pulse noise type : EAP series
Low leakage current type : EAM series
*Use of an EMI/EMC filter is recommended when a power supply is connected with several devices so that additional filtering is necessary.
*Make sure that your final application will meet the required EMC standard by measuring the EMI level of the power supply used together with an EMI/EMC filter.

- ① Series name
 - ② Single output
 - ③ Output wattage
 - ④ Universal input
 - ⑤ Output voltage
 - ⑥ Optional *1
 - C : with Coating
 - N : with cover
 - T : Vertical terminal block
 - J : Connector type
 - R3 : with Subfeatures (5V1A AUX, 12V1A AUX Remote ON/OFF, Alarm)
 - T5 : UL508
 - P5 : shutdown type overcurrent protection
- For option details, refer to instruction manual 6.1.

Please refer to derating curve, because the rated load current depends on cooling method that is convection cooling or forced air.

*Make sure necessary tests will be carried out on your end equipment with the power supply installed in accordance with any required EMC/EMI regulations.

Assembling and Installation Method

Installation method

- The screw should be inserted up to 6mm max from outside of the power supply to keep a distance between inside parts and an isolation.
- When two or more power supplies are used side by side, position them with proper intervals to allow enough air ventilation. Ambient temperature around each power supply should not exceed the temperature range shown in "derating".
- Fix firmly, considering weight, though it can be used by the installation method shown in right figure.

- If mounting on a metal chassis, keep at least 4 mm between the top of the power supply and the chassis for insulation between the components and the chassis. If the distance between the top of the power supply and the chassis is less than 4mm, insert an insulating sheet with reinforced insulation between the power supply unit and metal chassis. The following distance is not satisfactory for cooling condition. Please refer to "Derating" for cooling method.

Derating

● AEA600F Derating curve depends on Input voltage

● AEA1000F Derating curve depends on Input voltage

● AEA600F Ambient temperature Derating Curve (convection cooling)

100% Load factor in each derating curve means the rated current (convection cooling) in Specifications.

In the hatched area, the specification of Ripple and Ripple Noise are different from other area.

● AEA1000F Ambient temperature Derating Curve (convection cooling)

100% Load factor in each derating curve means the rated current (convection cooling) in Specifications.

In the hatched area, the specification of Ripple and Ripple Noise are different from other area.

● AEA600F Ambient temperature Derating Curve (forced air cooling)

100% Load factor in each derating curve means the rated current (forced air cooling) in Specifications.

In the hatched area, the specification of Ripple and Ripple Noise are different from other area.

● AEA1000F Ambient temperature Derating Curve (forced air cooling)

100% Load factor in each derating curve means the rated current (forced air cooling) in Specifications.

In the hatched area, the specification of Ripple and Ripple Noise are different from other area.

■ Forced air cooling

· AEA600F

① Please satisfy the below temperature at Point A and Point B under the forced air cooling. The Point A/B position is shown in the next figure.

- Point A 90°C or less and Point B 80°C or less at Ta = 50°C
- Point A 110°C or less and Point B 100°C or less at Ta = 70°C

② The forced air should be given to whole of the product.

Derating

- AEA1000F

① Please satisfy the below temperature at Point A and Point B under the forced air cooling. The Point A/B position is shown in the next figure.

- Point A 90°C or less and Point B 80°C or less at Ta = 50°C
- Point A 110°C or less and Point B 100°C or less at Ta = 70°C

② The forced air should be given to whole of the product.

Instruction Manual
