#### IEC Appliance Inlet C14 or C18 with Filter, Circuit Breaker TA45

Protection class I with shield

Protection class II without shield

C14	C18
70° C	70° C

# Description

- Panel mount :
- Screw-on mounting front side
- 3 Functions :
- Appliance Inlet protection class I or II , circuit breaker type TA45 2-pole , Line filter in standard and medical version
- Quick connect terminals 6.3 x 0.8 mm

#### **Unique Selling Proposition**

- Compact power entry module with circuit breaker
- High configurability
- Easy assembly with prewired modules
- Protection class I or II

### See below: Approvals and Compliances

#### **Characteristics**

- All single elements are already wired
- Unwired versions available on request
- Circuit Breaker non-illuminated or illuminated
- For applications according IEC/UL 62368-1 we recommend variants with bleed resistor
- Suitable for use in medical equipment according to IEC/UL 60601-1 (1 MOOP, 1 MOPP)

### References

Alternative: version without line filter 6145

We recommend for new applications DF12

#### **Approvals and Compliances**

Detailed information on product approvals, code requirements, usage instructions and detailed test conditions can be looked up in Details about Approvals

SCHURTER products are designed for use in industrial environments. They have approvals from independent testing bodies according to national and international standards. Products with specific characteristics and requirements such as required in the automotive sector according to IATF 16949, medical technology according to ISO 13485 or in the aerospace industry can be offered exclusively with customer-specific, individual agreements by SCHURTER.

# Approvals

The approval mark is used by the testing authorities to certify compliance with the safety requirements placed on electronic products. Approval Reference Type: 5145

Approval Logo	Certificates	Certification Body	Description

### **Attenuation Loss**

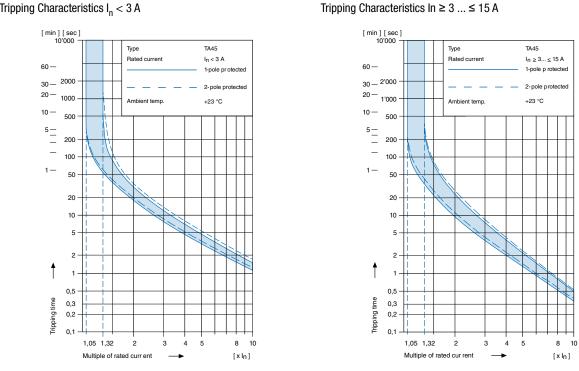

### Effect of ambient temperature

The units are calibrated for an ambient temperature of  $+23^{\circ}$ C. To determine the rated current for a lower or higher ambient temperature, use a correction factor (typical value) from the table below:

Ambient Temperature [°C]	Correction factor
-10	0.89
-5	0.91
0	0.92
+23	1.00
+30	1.03
+40	1.08
+55	1.16

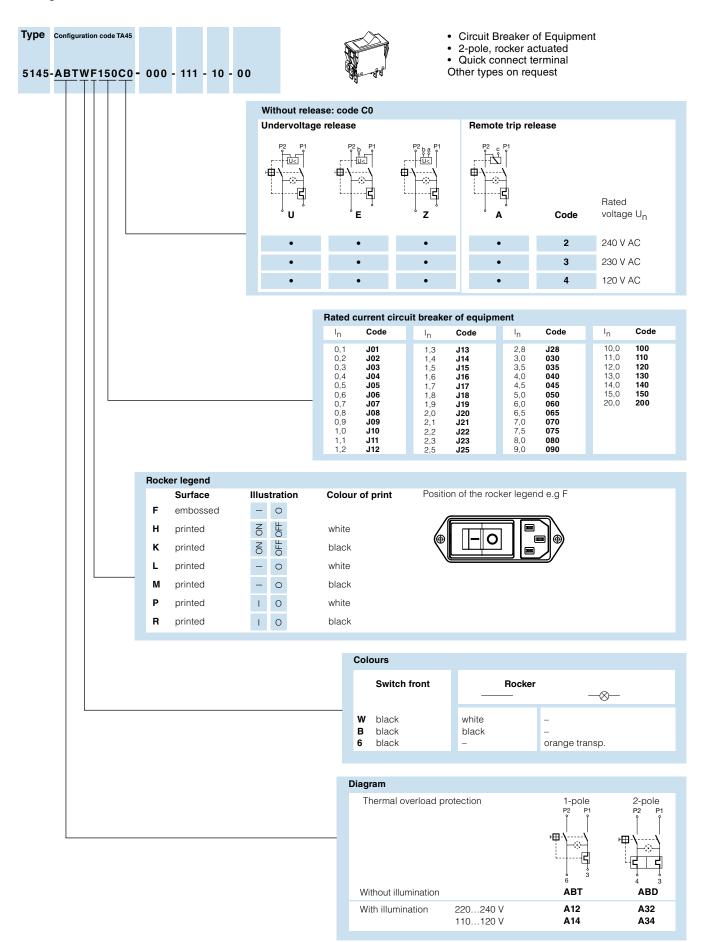

Example: Rated current = 5 A, Environmental temperature =  $40 \circ C$ , --> Correction factor = 1.08, Resulting current = 5.5 A --> Fount to next higher rated current: 6 A

## **Time-Current-Curves**
