

CM1442-06LP

LCD and Camera EMI Filter Array with ESD Protection

Functional Description

The CM1442-06LP is part of a family of pi-style EMI filter arrays with ESD protection, which integrates six filters (C-R-C) in a Chip Scale Package (CSP) form factor with 0.40 mm pitch. The CM1442-06LP (low profile) has component values of 15 pF – 100 Ω – 15 pF per channel. The CM1442-06LP has a cut-off frequency of 120 MHz and can be used in applications where the data rates are as high as 48 Mbps. The parts include avalanche-type ESD diodes on every pin, which provide a very high level of protection for sensitive electronic components against potential electrostatic discharge (ESD). The ESD protection diodes safely dissipate ESD strikes of ±15 kV, well beyond the maximum requirement of the IEC61000-4-2 international standard. Using the MIL-STD-883 (Method 3015) specification for Human Body Model (HBM) ESD, the pins are protected for contact discharges at greater than ±30 kV.

The CM1442-06LP is available in a space-saving, low-profile CSP with RoHS-compliant, lead-free finishing. It is manufactured with a 0.40 mm pitch and 0.15 mm CSP solder ball to provide up to 28% board space saving versus competing CSP devices with 0.50 mm pitch and 0.30 mm CSP solder ball.

Features

- Six Channels of EMI Filtering with Integrated ESD Protection
- 0.4 mm Pitch, 15-Bump, 2.360 mm x 1.053 mm Footprint Chip Scale Package (CSP)
- Pi-Style EMI Filters in a Capacitor-Resistor-Capacitor (C-R-C) Network
- ±15 kV ESD Protection on Each Channel (IEC 61000-4-2 Level 4, Contact Discharge)
- ±30 kV ESD Protection on Each Channel (HBM)
- Greater than 30 dB Attenuation (Typical) at 1 GHz
- These Devices are Pb-Free and are RoHS Compliant

Applications

- LCD and Camera Data Lines in Mobile Handsets
- I/O Port Protection for Mobile Handsets, Notebook Computers, PDAs, etc.
- EMI Filtering for Data Ports in Cell Phones, PDAs or Notebook Computers
- Wireless Handsets
- Handheld PCs/PDAs
- LCD and Camera Modules
