

MMC/SD Card PROTO Board

PID: MIKROE-335

The **MMC/SD Card PROTO Board** enables your prototype board to be connected to Multi Media and Secure Digital Cards. There is an MMC/SD card socket provided on the board used for placing these cards.

Specifications

Type	microSD
Applications	MMC/SD Card Board is ideal for fast data acquisition, storing images, music, video and data files, or any other application where fast mass storage is needed
On-board modules	MMC/SD card slot, DIP switches
Key Features	Fast voltage translators adjust proper voltage levels when used with 5V systems
Interface	SPI
Compatibility	Breadboard (PROTO)
Input Voltage	3.3V

Mikroe produces entire development toolchains for all major microcontroller architectures.

Committed to excellency, we are dedicated to helping engineers bring the project development up to speed and achieve outstanding results.

ISO 27001: 2013 certification of informational security management system.
ISO 14001: 2015 certification of environmental management system.
OHSAS 18001: 2008 certification of occupational health and safety management system.

ISO 9001: 2015 certification of quality management system (QMS).
