Description

Pasternack's PE7072 is a 50 ohm type N male to 75 ohm type F male matching pad that operates from DC to 3 GHz. This type N to type F impedance matching pad offers a low VSWR of 1.25:1 max and an attenuation accuracy of ± 0.5 dB. PE7072 50 ohm to 75 ohm minimum loss pad has a maximum CW power rating of 2 Watts.

Matching pads are used to match the different impedance between two devices, maximizing power transfer between the two impedances. Pasternack's minimum loss impedance matching pads are available in various connector combinations to fit your needs, all of which ship the same day.
