

INDUSTRIAL STRENGTH NITRILE GLOVES

OVER
6 MIL
THICK
2-PLY STRENGTH

THE PINNACLE OF PROTECTION, PERFORMANCE ... AND PRODUCTIVITY

Conceived and purpose-engineered for professionals who work with their hands for a living, PermaSafe Industrial Strength Nitrile Gloves are in a class of their own.

UNRIVALED STRENGTH & DURABILITY. At over 6 mils thick, with textured palms & fingers measuring in at 10.25 mils thick, our Industrial Gloves are 3-4 times thicker, 3-4 times more puncture resistant, & designed to last 3-4 times longer than other disposable gloves. Simply put, no comparable glove is tougher, offers greater protection, or is more resistant to tears and punctures. Period.

UNBEATABLE GRIP. With No-Slip, Raised Diamond Textured palms & fingers, our Industrial Gloves provide unprecedented grip. This unique texturing also produces a matrix of channels that funnel away liquids, to help keep even the wettest objects in your grasp and control.

UNMATCHED FIT, FEEL & COMFORT.

PermaSafe Industrial Gloves are specially molded to optimize comfort, while making them easier to put on and take off. More than just a grip enhancer, their Raised Diamond Texture also helps keep hands dry and comfortable by promoting internal air circulation. While thick enough to provide superior strength and durability, their light weight and elasticity help ensure users retain the feel and agility needed to handle small parts, tools, touchscreens, etc.

UNIQUELY MULTIPURPOSE.

PermaSafe Industrial Strength Nitrile Gloves are the perfect choice for an almost endless array of heavy-duty, industrial, commercial and household tasks including:

- Automotive
- Chemical
- Construction
- Food Service
- Industrial
- Janitorial
- Agriculture
- Police Use
- Sanitation
- Metalwork
- Painting
- Plumbing
