

KNIPEX Quality – Made in Germany

KNIPEX StepCut® XL

Easier cutting of multi-conductor cables

KNIPEX StepCut® XL

Easier cutting of multi-conductor cables

- ▶ High-leverage joint, long handles and optimized cutting edges for an easier cut than with compact cable shears
 - ▶ Large cutting capacity: cuts solid copper or aluminum cables up to 2 AWG, stranded cables up to 2/0 AWG and fine stranded cables up to 4/0 AWG
 - ▶ Dual cutting areas: step cutting edges position cables close to the joint and the front cutting edge is used for the gradual cutting/nibbling of larger cables
- > Easy one- or two-handed operation with minimal handle opening for large cable diameters
 - > Adjustable, high-leverage bolted joint provides precise and smooth cutting
 - > Slim head for better accessibility
 - > Pinch guard prevents operators' fingers being pinched
 - > **Not suitable for steel-reinforced cables, e.g. ACSR**
 - > Laser-hardened cutting edges (approx. 56 HRC)
