VMDSC60-30-M10-55-S

Ruland VMDSC60-30-M10-55-S, Vibration Isolation Mount, 60mm OD, M10 Threaded Studs, 28mm Stud Lengths, 30mm Height, 55 Shore A Natural Rubber Jacket, Stainless Steel

Description

Ruland VMDSC60-30-M10-55-S is a vibration isolation mount with two threaded studs. It has a 60mm outside diameter, M10 threaded studs, 28mm stud lengths, and 30mm height. This vibration isolation mount is used to dampen shock loads and reduce noise and wear on industrial equipment such as motors, conveyors, compressors, fans, or pumps which allows for a safer and more pleasant working environment. It is often referred to as a sandwich mount or rubber buffer because it functions as shock or vibration isolator sandwiched between two machine components or surfaces. VMDSC60-30-M10-55-S can be mounted to the system by passing it through an unthreaded hole and securing with a nut or threading it directly into tapped holes on the components it will be mounted to. The rubber jacket is made from natural rubber which has good elasticity. It has 55 Shore A hardness for a balance of rigidity and shock absorption. The stainless steel body allows for increased corrosion resistance. VMDSC60-30-M10-55-S is manufactured by Otto Ganter, inventoried by Ruland, and RoHS3 compliant.
