MT20-SSQ-200-A, With Scale

Ruland Hollow Square Tube With Scale, OD 16mm, ID 13mm, L 200mm, Aluminum

Description

Ruland MT20-SSQ-200-A is a hollow square tube with scale with a 16mm outer diameter, 13mm inner diameter, and 200mm overall length. It is designed to fit with Ruland clamp connectors, swivel components, and mounting bases that begin with MT20. MT20-SSQ-200-A is made of aluminum for reduced weight when compared to stainless steel round tubes. It is used to support components for mounting sensors, screens, reflectors, plexiglass machine guards, and other industrial components. Major increments are 10mm and minor increments 1mm giving the user a high degree of adjustment precision. When the system combines this tube with a clamp or swivel connector with adjustable clamping handle, the user can make fine rapid adjustments for improved efficiency and accuracy. MT20-SSQ-200-A is a more cost effective option than equivalently sized stainless steel tubes. This tube is hollow for reduced weight and to help protect wires from components such as cords and screens from being damaged. When combined with MT20-SQTUBECAP-P tube caps the user can drill in the tube cap to reduce cords exposure to the operating environment for safety. MT20-SSQ-200-A is precision ground to help reduce surface imperfections. It is manufactured by Otto Ganter, inventoried by Ruland, and RoHS3 compliant.

Product Specifications

Square Inner Diameter ID	13 mm	**Square Outer Diameter OD**	16 mm
Overall Length L1	200 mm	**End To Scale L2**	20 mm
Fits With Clamps	MT20	**Weight (lbs)**	0.093700
Material Specification	Aluminum	**Manufacturer**	JW Winco/ Otto Ganter
UPC	634529231227	**Country of Origin**	Germany
Tariff Code	7609.00.0000	**UNSPC**	31162908
