## Magnetic buzzer

Magnetic buzzer

### Characteristics

|                   |                 |                               |
|-------------------|-----------------|-------------------------------|
| Size (LxWxH) [mm] | 8.5x8.5x4.0     |                               |
| Type              | Magnetic buzzer |                               |
| Form factor       | Rectangular     |                               |
| SPL [dBSPL]       | 100             | dBSPL min. @10 cm @<br>Vrated |
| F0 [Hz]           | 4000            |                               |
| Rated voltage     | 5.0             |                               |
| Vmax              | 6.0             |                               |
| Termination       | SMD             |                               |

Specifications are subject to change without prior notice. Upon request Ole Wolff can supply further specifications, simulation parameters etc.

### Mechanical drawing

Unit: mm Tolerance: ±0.5mm Except Specified
